<sup>†</sup> Unless otherwise noted in the chart above, all plan deductibles and/or out-of-pocket maximums (OOPMs) are embedded.

\* Member amount after the deductible is met.

NoDD: Not subject to deductible.

# The Difference Between an Aggregate and Embedded Plan

Aggregate (AGG): For any policy with two or more members, the deductible must be met by any one or any combination of members before the plan will make payments.

Embedded: Each member pays toward, but never exceeds, their individual deductible and/or OOPM until the larger family deductible and/or OOPM is met. Once the family deductible and/or OOPM are met, the plan makes payments for all services of all members on the contract, regardless of the status of any remaining individual deductible and/or OOPM levels.
